Lucille Voice & Likeness Disclosure and Consent

Escape Enterprises LLC · Prepared October 25, 2026 · DRAFT for legal review before signing

In plain words

Denise, this lets Escape use your voice, face and likeness to bring Lucille to life, for as long as you allow it. You can withdraw at any time with written notice.

- **What we use:** your voice recordings, an AI voice model made from them, and your face and likeness for Lucille's look.
- **Where it appears:** inside the Escape app and website, and in Escape's own marketing for the app.
- **What we never do:** use you for anything sexual, political, hateful or deceptive, sell or license you to anyone else, or make Lucille say things presented as your real personal views.
- **Your control:** you approve new kinds of use and can see samples, and if you withdraw we stop new uses and delete your voice model.
- **What you get:** described in Section 6 (no cash fee).

Please read it fully and have your own lawyer look at it before you sign. Escape will reimburse up to the amount in **[Key Term 5]** of that review.

This is a draft prepared for Escape Enterprises LLC to review with counsel. It is not legal advice.

Key Terms

Fill these in once. The Agreement refers to them by number.

1. Effective date of this Agreement

2. Escape Enterprises LLC address

3. Denise's full legal name

4. Denise's address

5. Legal review reimbursement (US $)

6. Equity (if ticked in Section 6): amount, type and equity agreement date

7. Other consideration (if ticked in Section 6)

8. Where to send withdrawal notice

9. Denise's counsel (name, firm), if reviewed

10. County for disputes (Indiana)

1. Parties and background

This Disclosure and Consent (the **"Agreement"**) is made on the effective date in **[Key Term 1]** between:

- **Escape Enterprises LLC**, an Indiana limited liability company at the address in **[Key Term 2]** (**"Escape"**); and
- **Denise**, named in full in **[Key Term 3]**, an individual residing at the address in **[Key Term 4]** (**"Denise"**).

Lucille is the AI self-care companion inside the Escape app (the **"App"**) and on Escape's website (the **"Site"**). Denise has recorded voice performances for Lucille (the **"Recordings"**, listed in Schedule A) and may provide photographs, video or a face scan for Lucille's look (the **"Visual Materials"**).

Under Indiana law (Ind. Code § 32-36-1-8), using a person's name, voice, image, likeness or distinctive appearance for a commercial purpose requires that person's prior written consent. This Agreement is that consent, given only on the terms below.

2. Disclosure: how your voice and likeness are used

Escape discloses the following so Denise's consent is informed. Escape will tell Denise in writing before any of it materially changes.

Voice

1. **Reference clip.** Escape cuts a short reference clip (currently about 16 seconds) from the Recordings.
2. **AI voice model.** That clip conditions an open-source text-to-speech model (Chatterbox, by Resemble AI) running on Escape's own Google Cloud servers. The model can then speak **new sentences Denise never recorded** in a voice resembling hers (a **"Digital Voice Replica"**). Escape does not send the Recordings to third-party voice-cloning services.
3. **Robotic finish.** Every line Lucille speaks gets a light synthetic effect (about 30% mix), so listeners can tell it is an AI voice.
4. **Watermark.** The model embeds an inaudible watermark in its output that identifies the audio as AI-generated.
5. **What Lucille says.** Lucille's words are generated live by AI in response to each user, within Escape's safety rules. Escape does not review every line before it is spoken.

Face and likeness

1. Escape may use the Visual Materials to design Lucille's look. That includes illustrations, a 3D avatar for the Escape Innerverse, and AI-generated images or animation based on Denise's appearance (a **"Digital Visual Replica"**).
2. Any Digital Visual Replica that will be shown publicly is first sent to Denise for approval (Section 5).

Where it appears

- In the App (iOS and Android), as Lucille's voice in chat, voice conversations, guided sessions and notifications
- On the Site and in App Store or Google Play listings
- In Escape's own advertising and social media promoting the App
- In demos for investors, partners and press about Escape

The Digital Voice Replica and Digital Visual Replica are together the **"Digital Replicas"**.

3. Permission granted

Denise gives Escape a **non-exclusive, worldwide, royalty-free, non-transferable** permission, revocable under Section 7, to:

1. Record, store, edit and process the Recordings and Visual Materials.
2. Create, host and run the Digital Replicas as described in Section 2.
3. Use the Recordings and Digital Replicas as the voice and likeness of the Lucille character, for the uses listed under "Where it appears" in Section 2.
4. Use Denise's name, but only if she approves the wording first (Section 5).

Non-exclusive means Denise remains free to use her own voice and likeness for anything else, including other voice work, AI or not.

Non-transferable means Escape may not license, sell or give these rights to anyone else. One exception: if Escape is acquired, the rights may pass to the buyer, but only for continuing the Escape App. The buyer is then bound by this Agreement, and Denise is told in writing within 30 days.

Service providers who host or run Escape's systems (such as Google Cloud) may process the materials only on Escape's behalf. They get no rights of their own.

4. Limits: what Escape will never do

Without Denise's separate written consent for that specific use, Escape will not use the Recordings or Digital Replicas:

- in sexual, explicit or romantic content
- for political, religious or social-cause messaging, or to endorse any candidate or campaign

- to endorse any product or brand other than Escape itself
- in hateful, violent, defamatory or harassing content
- to impersonate Denise, or to present Lucille's words as Denise's real personal statements, opinions or experiences
- to make calls, voicemails or messages that could be mistaken for Denise herself
- to train AI models other than the Lucille voice model, or to build a general voice library
- in medical, legal or financial advice presented as coming from a real professional

Escape will keep safety guardrails in Lucille's AI that are designed to stop these uses. If Escape learns of a breach, it will remove the content as soon as practical, and within 72 hours tell Denise what happened and what was done.

5. Approval, credit and AI transparency

Approval. Escape will send Denise for approval:

- any Digital Visual Replica before it is shown publicly
- any advertising that uses her voice or likeness, before it runs
- any use of her name, and its wording
- any new kind of use not listed in Section 2

Denise will reply within **10 business days**, and may not withhold approval unreasonably. If she does not reply in time, Escape follows up once in writing. Silence for a further 5 business days counts as approval, except for new kinds of use, which always need a written yes.

Samples. At any time, Denise may ask for samples of how Lucille's voice currently sounds, and Escape will provide them within 10 business days.

Credit. Where Escape lists credits (the App's About screen, the Site), Lucille's voice will be credited as **"Voice of Lucille: Denise [surname as in [Key Term 3]]"** unless Denise asks to stay anonymous.

AI transparency. Escape will tell users clearly that Lucille is an AI and that her voice is AI-generated, based on a real performer who consented. Escape will not suggest that Denise personally speaks with users or reads their messages.

6. What Denise receives

No cash fee is paid for the permission in this Agreement. In exchange, Denise receives (tick what applies):

- ☐ **Equity:** as described in **[Key Term 6]**, under a separate equity agreement. That agreement governs vesting, and this Agreement does not change it.
- ☐ **Lifetime access:** a free Escape Journey Pass for as long as the App runs

- ☐ **Credit and portfolio use:** the credit in Section 5, plus the right to show Lucille's voice and look in her own portfolio and reel
- ☐ **Other:** as described in **[Key Term 7]**

Denise acknowledges this is full consideration for the permission. Any future paid work, such as new recording sessions, appearances or a commercial campaign, will be agreed and paid separately.

Note for Escape's counsel: if equity is the consideration, confirm the equity paperwork and its securities-law treatment separately. Also confirm that revoking this Agreement does not affect vested equity.

7. Term and withdrawing consent

Term. This Agreement starts when both parties sign. It continues with no end date until Denise withdraws her consent or Escape stops using the Digital Replicas.

Withdrawing. Denise may withdraw at any time, for any reason, by written notice (email counts) to the address in **[Key Term 8]**. After notice:

When	What Escape does
Within 7 days	Stops generating new speech or images with the Digital Replicas. Lucille switches to a different voice and look.
Within 30 days	Deletes the Digital Voice Replica (the reference clip and any model conditioning), the Recordings and the Visual Materials from all active systems. Confirms the deletion to Denise in writing.
Within 60 days	Removes her voice and likeness from the Site, App listings and any ads Escape controls.
Within 90 days	Backups holding the materials expire or are destroyed on their normal schedule. They are never restored for use.

What can stay. Escape does not have to recall:

- copies already downloaded to users' phones (they are replaced at the next App update)
- materials already published by press or others outside Escape's control
- records Escape must keep by law

Escape will not create anything new from them.

Survival. Sections 4 (Limits), 8 (Data) and 9 (General terms) continue after withdrawal. Withdrawal does not affect consideration Denise has already received or vested.

If Escape stops. If Escape winds down or stops using Lucille's current voice for 12 months in a row, it deletes the materials as if Denise had withdrawn, and tells her.

8. Storage, security and deletion

- **Where:** the Recordings, Visual Materials and Digital Replicas are stored only in Escape's Google Cloud project (United States). Source files are kept in a private, access-controlled location, never in public storage or shared drives.
- **Who:** access is limited to named Escape staff and contractors who need it, each bound by confidentiality. Escape keeps a list of those people and shares it with Denise on request.
- **Protection:** encrypted in transit and at rest. The voice service is not reachable without Escape's private key.
- **Misuse:** if Escape learns of unauthorized access to, or copying of, the materials or the Digital Replicas, it tells Denise within 72 hours. It takes reasonable steps to stop the misuse and get the copies taken down.
- **Deletion on request:** besides withdrawal under Section 7, Denise may ask Escape to delete specific Recordings or Visual Materials it does not need. Escape will do so within 30 days.

9. General terms

Ownership. Denise keeps all rights in her own voice, name, face and likeness. Escape owns the Lucille character, its name, the App, and the text and code that drive it. Neither party owns the other's part. Escape owns the copyright in the Recordings and Visual Materials it paid for or produced, subject to this Agreement. Its right to *use* them ends on withdrawal.

Denise confirms that:

- she is at least 18
- the voice and likeness are her own
- she has not given anyone exclusive rights that conflict with this Agreement (for example, an agency or union contract)

Escape confirms that it:

- will use the Digital Replicas only as this Agreement allows
- is responsible for what Lucille says in the App
- will defend Denise against third-party claims arising from Escape's use of the Digital Replicas, except claims caused by Denise's own breach

Legal representation. Denise confirms she was advised to have this Agreement reviewed by a lawyer of her choice before signing, and was given time to do so. Tick one:

☐ Reviewed by counsel (named in **[Key Term 9]**)

☐ Denise chose not to use counsel

Governing law. Indiana law governs, including Indiana's right-of-publicity statute (Ind. Code § 32-36-1). Disputes go to the state or federal courts in the county in **[Key Term 10]**, Indiana. If a later state or federal digital-replica law gives Denise more protection, that protection applies and the parties will update this Agreement to match.

Other. Changes must be in writing and signed by both parties. If any clause is unenforceable, the rest still applies. Electronic signatures and email notices count. This is the whole agreement on these rights, alongside any equity agreement referenced in Section 6.

Signatures

By signing, Denise confirms she has read this Agreement, understands how her voice and likeness will be used, including as an AI Digital Voice Replica that can say things she never recorded, and consents freely.
