Privacy Policy

Last updated October 27, 2026 · Escape Enterprises LLC

Our promise. We collect only what Escape needs to work, we never sell your data or use it for ads, and you can delete your account and its data from the app at any time.

1. Who we are

This policy explains how Escape Enterprises LLC ("Escape", "we") handles information when you use the Escape app, Lucille (Escape's AI self-care concierge), Soundscapes, the Innerverse and this website.

Escape is a self-care and wellbeing app. It is not a medical device and does not provide therapy, diagnosis or treatment.

If you live in Washington, Nevada or Connecticut, our Consumer Health Data Privacy Policy also applies and explains your health-data rights in more detail.

2. What we collect

Information you give us

- **Account:** name, email, sign-in method (Apple, Google or email) and your age band (13–17 or 18+). We do not store your birthday.
- **Check-ins:** mood words, sliders and notes. If you connect Apple Health or Health Connect, the heart-rate reading taken at that moment is saved with the check-in.
- **Journal:** entries you write or dictate.
- **Conversations with Lucille:** messages you type, what you say in voice chat (as a transcript), and short memories Lucille keeps so she can follow up with you.

- **Plans and progress:** self-care plans, completed sessions, coins, streaks and Energy Scan results.
- **Feedback:** thumbs up or down on Lucille's replies. Written feedback is kept only if you turn on "Help improve Lucille".
- **Reports:** if you report one of Lucille's replies, the reply and your reason.

Information from your device, only if you allow it

- **Apple Health / Health Connect:** we read heart rate, heart-rate variability, resting heart rate, sleep, steps and State of Mind to tune sessions, and we save mindful minutes back. Health data is never sold, never used for advertising and never stored in iCloud.
- **Camera (Mood Scan):** you place a fingertip over the camera and flash. The phone reads the color change on the device to estimate your pulse. No photo or video is saved or sent; only the pulse number leaves your phone.
- **Microphone and speech recognition:** when you talk with Lucille or dictate a journal entry. The recording is sent for transcription and is not stored by Escape.
- **Approximate location** (about 1 km) to match Soundscapes to your local weather and time of day.
- **Photos** you pick for your profile or a journal entry.
- **Notifications:** a push token, if you allow reminders.

Collected automatically: app version, device type, crash reports, performance data and which screens you use. We do not use advertising IDs, ad networks or cross-app tracking.

From app stores: an age-range signal from Apple or Google where the law requires it (for example, Texas). We use it only to apply age protections.

3. How we use it

- To run Escape: your account, check-ins, journal, plans, Soundscapes and the Innerverse.
- To let Lucille reply with context and suggest what may help today.
- To award coins, calculate your Energy Scan and send the reminders you choose.
- To keep people safe: to detect when someone may be at risk and show crisis resources (see our Safety & Crisis Protocol).
- To keep Escape secure, fix bugs and improve features, using de-identified or aggregated data where we can.
- To compare versions of Lucille in a small, opt-in experiment (see below).

We do not sell your data, use your wellbeing content for advertising, or show ads in Escape.

4. AI services we use

Lucille is an AI. To answer you, your messages and the context she needs are sent to AI providers that process them for us under contract:

- **OpenAI** writes Lucille's replies and transcribes voice recordings. [confirm: OpenAI zero-data-retention status and retention period]
- **Anthropic** writes replies only for adults who join our Lucille experiment. You're asked before you join and can leave any time in Privacy & data. Teens are never included.
- **Lucille's voice** is generated on our own Google Cloud servers from a voice actor who consented to its use. Your messages are not used to train that voice.

Our providers may not use your data to train their models for anyone else. [confirm: contract terms for each provider]

5. Who we share it with

We share information only with service providers that process it for us under contract, or when the law requires it:

- **Google Cloud and Firebase:** hosting, database, sign-in, notifications, crash reports and analytics.
- **OpenAI and Anthropic:** Lucille's replies and transcription, as described above.
- **Vagon:** streams the Innerverse to your phone. [confirm: whether Vagon keeps session logs]
- **Partner brands:** when you redeem a partner reward, we give you a code. We don't send your personal information to the brand.
- **Legal and safety:** if required by law, or to protect someone's life or safety.

6. How long we keep it

We keep your information while your account is active. When you delete your account, we delete your personal data from our active systems within 30 days, and from backups as they roll off within [confirm: backup period].

- Voice recordings: not stored by Escape; transcripts are kept with your conversation.
- Conversations and memories: until you delete them or your account. [confirm: automatic deletion period, if any]
- Safety reports: [confirm: period] so we can review them and meet reporting duties, without your name in any report we publish.
- Crash and performance data: [confirm: period].

7. Security

Data is encrypted in transit and at rest, access is limited to people who need it, and keys are kept in a secrets manager. No system is perfect; if a breach affects you, we will tell you as the law requires, including within 60 days under the FTC Health Breach Notification Rule.

8. Your choices

- **In the app (Profile → Privacy & data):** download your data, delete a type of data (for example, all Lucille memories), withdraw consents, or delete your account.
- **On the web:** request deletion at https://escapeapp.ai/delete-account.
- **On your device:** turn off Health, camera, microphone, location or notifications at any time.

9. Your rights by state

Depending on where you live, you can ask to know, access, correct, delete or get a copy of your personal information, and to opt out of sale, sharing for targeted advertising and profiling. We don't sell or share data for advertising, so those apply automatically.

- **California (CCPA/CPRA):** you can limit our use of sensitive personal information. We already use it only to provide Escape. We do not discriminate against you for using your rights.
- **Washington, Nevada and Connecticut:** see the Consumer Health Data Privacy Policy.
- **EEA and UK:** you have rights under the GDPR, including to object and to complain to your data protection authority.

To make a request, use Privacy & data in the app or email privacy@escapeapp.ai. We'll confirm who you are, answer within 45 days, and tell you if we need more time. If we decline, you can appeal by replying "Appeal" to our answer; we'll respond within 45 days and, if you're still unhappy, you can contact your state attorney general.

10. Children and teens

Escape is for people 13 and older. If we learn someone is under 13, we block the app and delete their account and data.

For 13- to 17-year-olds we add protections: a reminder every hour that Lucille is an AI, reminders to take a break, no partner rewards, and no AI experiments.

11. Website and Do Not Track

This website doesn't track you across other sites, uses no advertising cookies, and treats every visit the same whether or not your browser sends Do Not Track or Global Privacy Control.

12. Changes and contact

We'll update this page when our practices change and tell you in the app about significant changes.
