DRAFT for counsel review. Items marked [confirm] still need a final answer.

Safety & Crisis Protocol

Last updated October 27, 2026 · Escape Enterprises LLC

Our promise. When someone may be at risk, Lucille stops and shows real crisis help. That message is written by our team in advance; it is never generated by AI.

1. If you need help now
2. How we notice someone may be at risk
3. What happens next
4. Reminders that Lucille is an AI
5. Extra protections for teens
6. Reporting a reply
7. Yearly reporting
8. Contact

1. If you need help now

Call or text **988** (Suicide & Crisis Lifeline, US) · Text **HOME to 741741** (Crisis Text Line) · Call **911** in an emergency · Outside the US: findahelpline.com.

Lucille is an AI. She can't call for help, and she isn't a crisis service.

2. How we notice someone may be at risk

- **On your phone:** before a message leaves your device, Escape checks it for signs of suicidal thoughts, self-harm or wanting to die, including common ways people say it.
- **On our servers:** every message to Lucille, typed or spoken, is checked again before any AI sees it, for signs of suicide, self-harm and threats of violence. [confirm: add eating-disorder phrases before Jan 1, 2027 (Washington HB 2225)]
- The checks are tested against a list of real-world example phrases and updated when we find gaps. [confirm: name the evidence-based screening approach counsel and clinicians approve]

3. What happens next

- Lucille does not reply with AI. Instead, Escape shows a fixed message written by our team, with 988, the Crisis Text Line, 911 and findahelpline.com, and one-tap buttons to call or text.
- The "I'm really struggling" button on the check-in screen opens the same help at any time.
- We record that crisis resources were shown (not the words of the conversation in any report) so we can count referrals and improve.

4. Reminders that Lucille is an AI

- At the start of every conversation, typed or spoken.
- Every 3 hours (or about every 12 messages) during a conversation.
- For 13- to 17-year-olds: every hour (or every 5 messages), plus reminders to take a break.
- Lucille never claims to be human, to have feelings, or to be a therapist.

5. Extra protections for teens

- Hourly AI reminders and break reminders.
- No romantic or sexual content; Lucille is instructed to refuse it for everyone.
- No partner rewards and no AI experiments.
- [confirm: teen memory and notification defaults and parental controls before July 1, 2027 (California SB 1119)]

6. Reporting a reply

Tap **Report** under any reply from Lucille, or email support@escapeapp.ai with the date and time. Our team reviews safety reports within [confirm: hours/days], and we use them to fix Lucille and our safety checks.

7. Yearly reporting

Starting July 1, 2027, we report each year to the California Office of Suicide Prevention, and where required to other states, how many times we showed crisis resources and the protocols on this page. Reports contain no personal information.
